PROFESSIONAL SUMMARY

Detail-oriented BCA undergraduate with a strong foundation in Python, SQL, and data structures, complemented by hands-on project work in data visualization. Quick learner currently expanding expertise in Power BI, with a keen interest in translating raw data into actionable business insights. Combines academic grounding in computer applications with self-driven, certification-backed learning to stay current with in-demand analytics tools. Seeking an entry-level Data Analyst opportunity to apply analytical and technical skills in a professional environment.

CORE COMPETENCIES

Analytical & Logical Thinking • Problem Solving • Data Visualization • Attention to Detail • Quick Learner • Team Collaboration • Time Management

EDUCATION

Bachelor of Computer Applications (BCA)

2024 – Present

Ambalika Institute of Higher Education, affiliated to University of Lucknow

- Currently progressing into 2nd year of the program.

Class XII (Higher Secondary)

UPMSP Board • Stream: PCM (Physics, Chemistry, Mathematics) • Percentage: 86.40%

TECHNICAL SKILLS

Python Programming • SQL • Data Structures & Algorithms (DSA) • Programming in C • Power BI (Learning)

TOOLS & TECHNOLOGIES

MS Excel • NumPy • Git & GitHub • Power BI (Power Query, Data Modeling)

PROJECTS

Fantasy Cricket Game

Personal Project

- Designed and developed a fantasy cricket game application in Python, applying core logic-building and object-oriented programming concepts.
- Implemented player selection, scoring, and result-calculation logic to simulate real-time fantasy sports mechanics.
- Managed source code and version history using Git and GitHub.

Repository: github.com/abhijeetmishra961625-spec/Fantasy-Cricket-Game

PhonePe Transaction Data Dashboard

Data Visualization Project

- Built an interactive Power BI dashboard analyzing PhonePe transaction data to surface usage trends and key insights.
- Used Power Query to clean, transform, and prepare raw transaction data for analysis.
- Built the underlying data model in Power BI to structure and relate data tables for accurate reporting.

Python Trading Bot

Personal Project

- Developed an automated trading bot in Python to analyze market data and execute rule-based buy/sell strategies.
- Used NumPy for numerical computations supporting trend detection and trade-decision logic.
- Maintained project code on GitHub with version control using Git.

Repository: github.com/abhijeetmishra961625-spec/python-trading-bot

AREAS OF INTEREST

Data Analysis • Business Intelligence • Data Visualization • Database Management • Python Development

TRAINING & CERTIFICATIONS

- Online Summer Training in Python Programming with AI — Internshala
- 30-Day Python Programming Course — Certified
- 30-Day Power BI Course — Certified
- Brand Champion Program — Internshala Training — Certified

LANGUAGES

- Hindi — Fluent
- English — Working Proficiency

KEY HIGHLIGHTS

- Completed 3 hands-on Python projects, two version-controlled and hosted on GitHub.
- Earned 3 industry-recognized certifications in Python and Power BI, including hands-on Power Query and data modeling work.
